www.BluePellets.com

DIMENSIONS:

ø 6 mm or ø 8 mm

TECHNICAL PARAMETERS:

Humidity	< 8 %
Ash content	< 0,5 %
Calorific value	> 18 000 kJ/kg, 5 kWh/kg
Content	100% coniferous wood
Packing	15 kg

PRODUCT SPECIFICATION:

- High calorie- 5 kWh/kg.
- Small ash content after combusting makes ash removing very rare.
- Comfortable usage due to 15 kg bags.
- Ecological- „0 emission of Co2“, no harmful substances, from wooden waste, ash can be used as a natural fertilizer.
- No allergy and inconvenient smells.
- Clean in usage and storage vs. coal and other loose biomass.

CONTENT

Pellets are wooden granules produced from pure sawdust and chips. Pellets are made of 100% coniferous wood: spruce and pine.

TRANSPORT

Pellets should be protected against soaking. It is recommended to use covered means of road transport.

Please arrange and protect the goods in accordance with transport regulations.

It is also significant, regarding the product condition delivered to customer.

STORAGE

Pellets should be stored in dry place and protected against atmospheric conditions.

Pellets bags must be stored on wooden pallets.

PACKING

Pellets are packed in 15 kg bags.

Collective package contains 65 bags on pallet: 975 kg.

Dimensions of collective package: width 120 cm x depth 100 cm x height max. 165 cm.

Product is placed on wooden pallets: 120 cm x 100 cm. It is covered by stretch foil.
